Hi John,

Regarding Bolcan Mining Corporation's proposed small White Mine (S/001/0081) that Michael Stanford started to permit, we would like you to update us on your plans. As the incomplete State of Utah (UDOGM) Notice of Intent paperwork identifies, the proposed project would remove waste dump material for off-site processing.

See the attached correspondence from Michael Stanford (incomplete Notice of Intention to Commence Small Mining Operations), UDOGM (additional information required), and BLM (Notice approval and need for cultural resource mitigation).

There is a bond posted for this proposed mine (\$9,400), but cultural resource conflicts need to be resolved before activities could be permitted, and the proposed UDOGM Notice of Intent was never completed, so no permit has been issued.

The complete BLM Notice (UTU-90258) looks like it is only good for removal of 1,000 tons or less. Be sure to talk with Ed Ginouves about the status of their permit, when it expires (March 2016?), and especially what is involved in cultural resource mitigation. Refer to the related discussion in the attached BLM letter.

Will you respond to let me know whether you want to either proceed with permitting or to request file closure and bond release from UDOGM? Thanks.

If you want to request release, please submit to the Division the following form, signed by an authorized officer of Bolcan Mining Corporation: https://fs.ogm.utah.gov/PUB/MINES/Minerals_Related/FORMS/MR-SITE.pdf

Peter
